## INTERNATIONAL SEARCH REPORT

#### FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210.

Continuation of Box II.1

Although claims 10 and 17 are directed to a method of treatment of non-human animals, the search has been carried out and based on the alleged effects of the composition.

Continuation of Box II.2

Claims Nos.: 1-4 and 7-17

Present claims 1-4 and 7-17 relate to an extremely large number of possible derivatives of IAA. Support within the meaning of Article 6 PCT and/or disclosure within the meaning of Article 5 PCT is to be found, however, for only a very small proportion of the derivatives claimed. In the present case, the claims so lack support, and the application so lacks disclosure, that a meaningful search over the whole of the claimed scope is impossible. Consequently, the search has been carried out for those parts of the claims which appear to be supported and disclosed, namely those parts relating to the derivatives of claims 5 and 6. Furthermore, the broad reference to an enzyme capable of converting the derivative into free IAA in claim 4, the lack of disclosure of the features of the conversion mentioned in claim 7, and the lack of disclosure of the requirements/ features of the composition for governamental approval is objected under Articles 5 and 6 PCT.

The applicant's attention is drawn to the fact that claims relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure. If the application proceeds into the regional phase before the EPO, the applicant is reminded that a search may be carried out during examination before the EPO (see EPO Guideline C-VI, 8.5), should the problems which led to the Article 17(2) declaration be overcome.
